Workflow

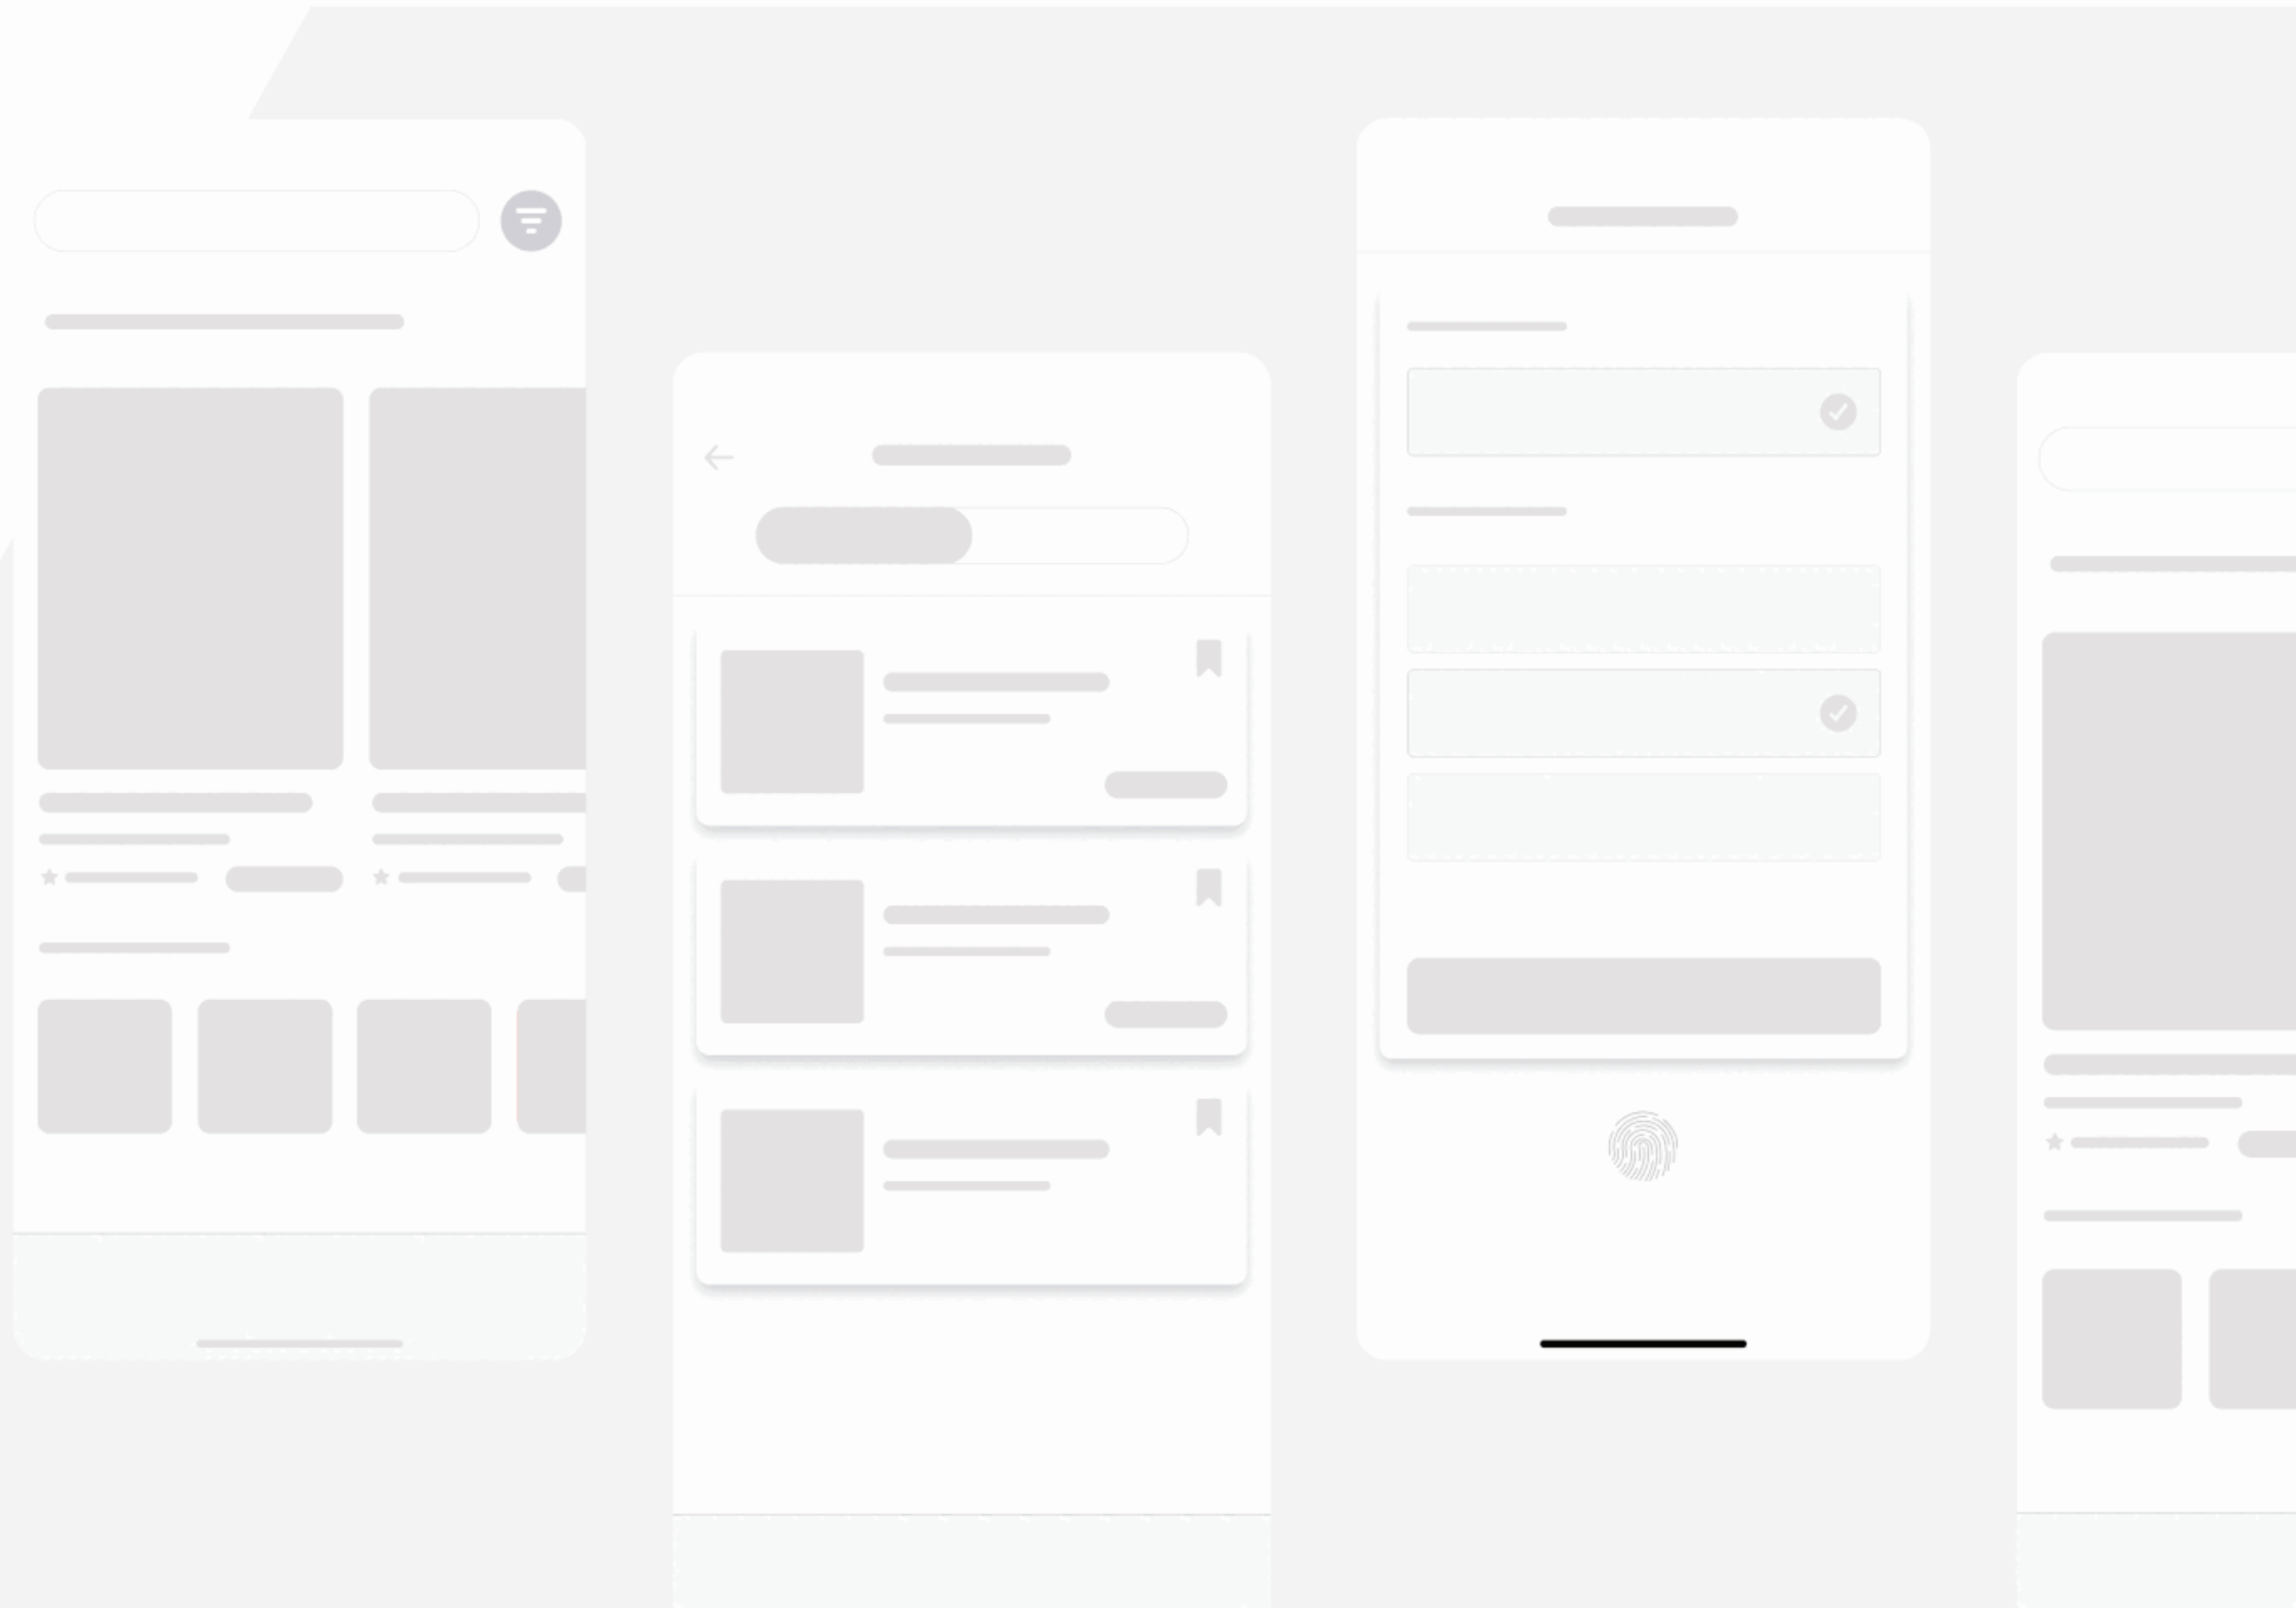

In the process of creating a food delivery app like DoorDash, Uber Eats, Grubhub, Seamless or Postmates, it is essential to identify the workflow with a business strategy diagram.

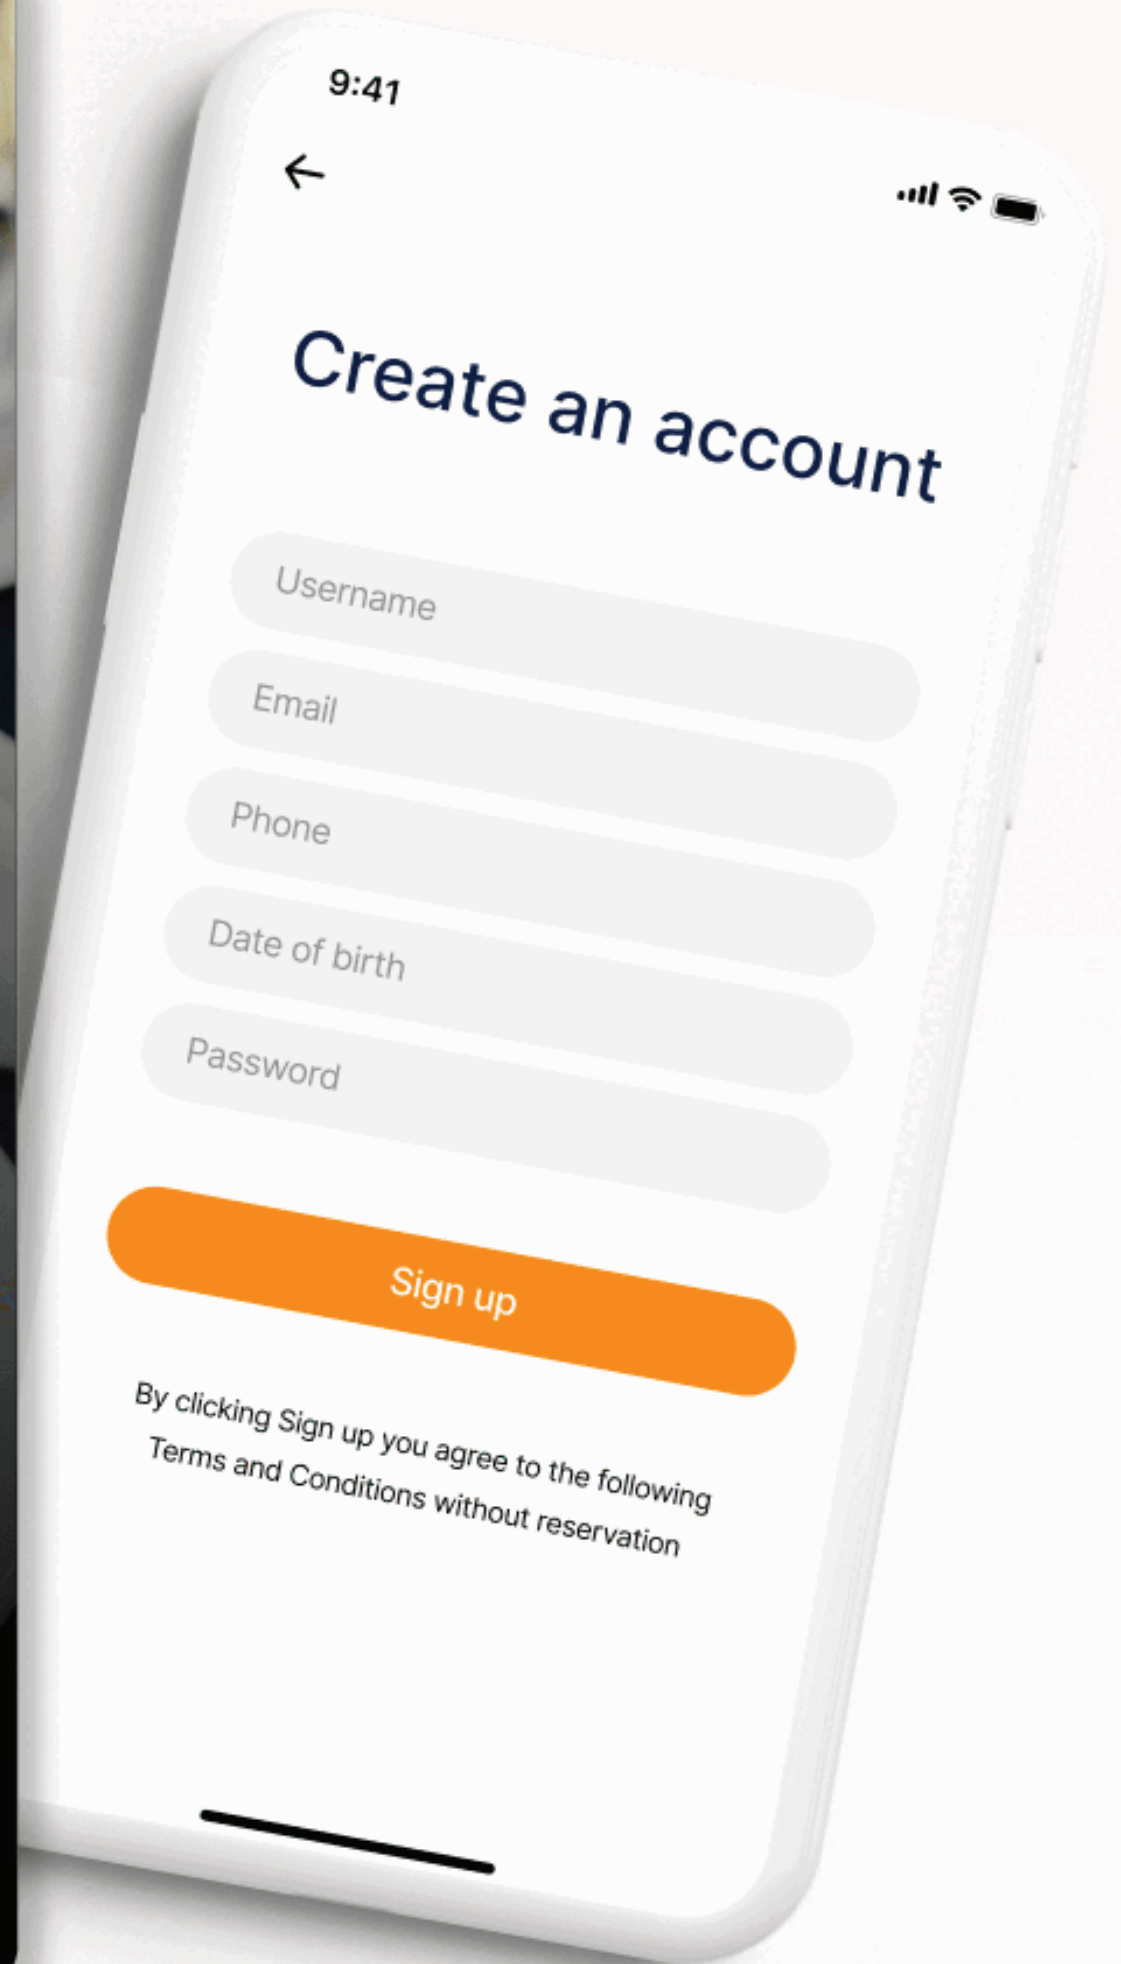

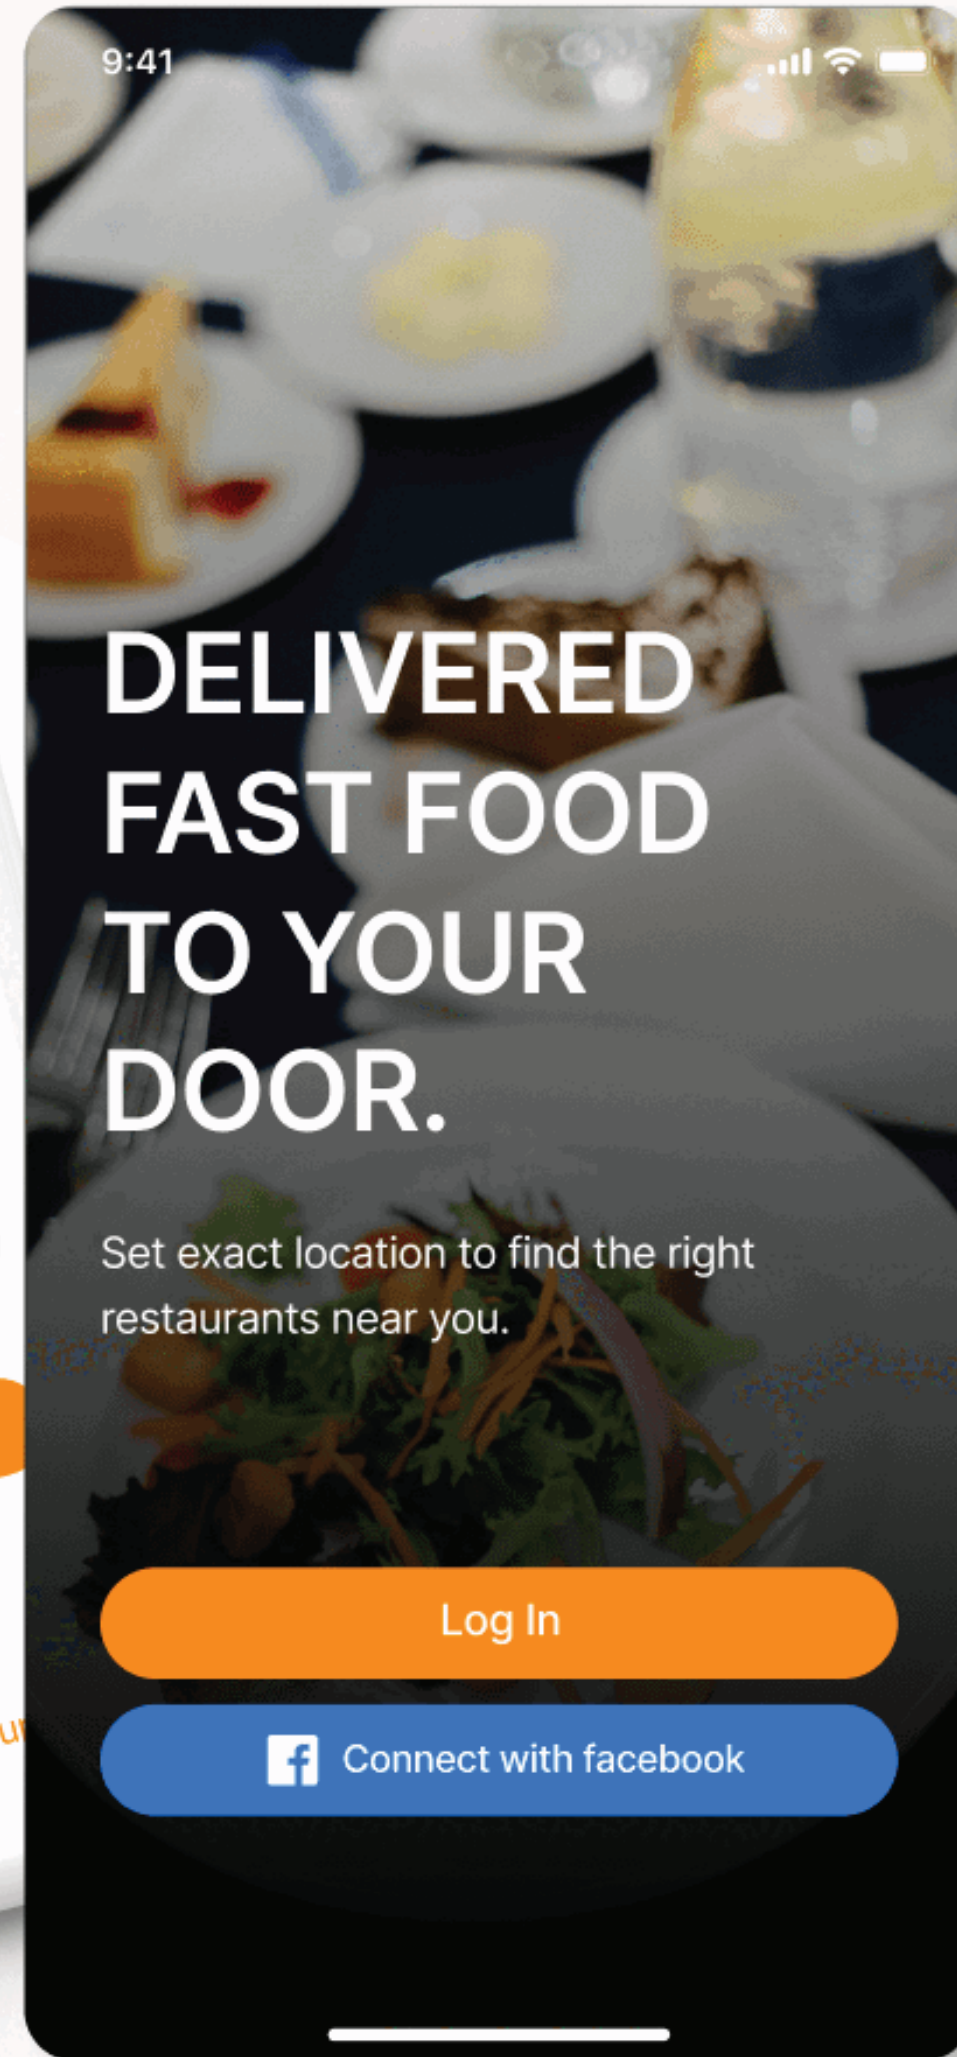

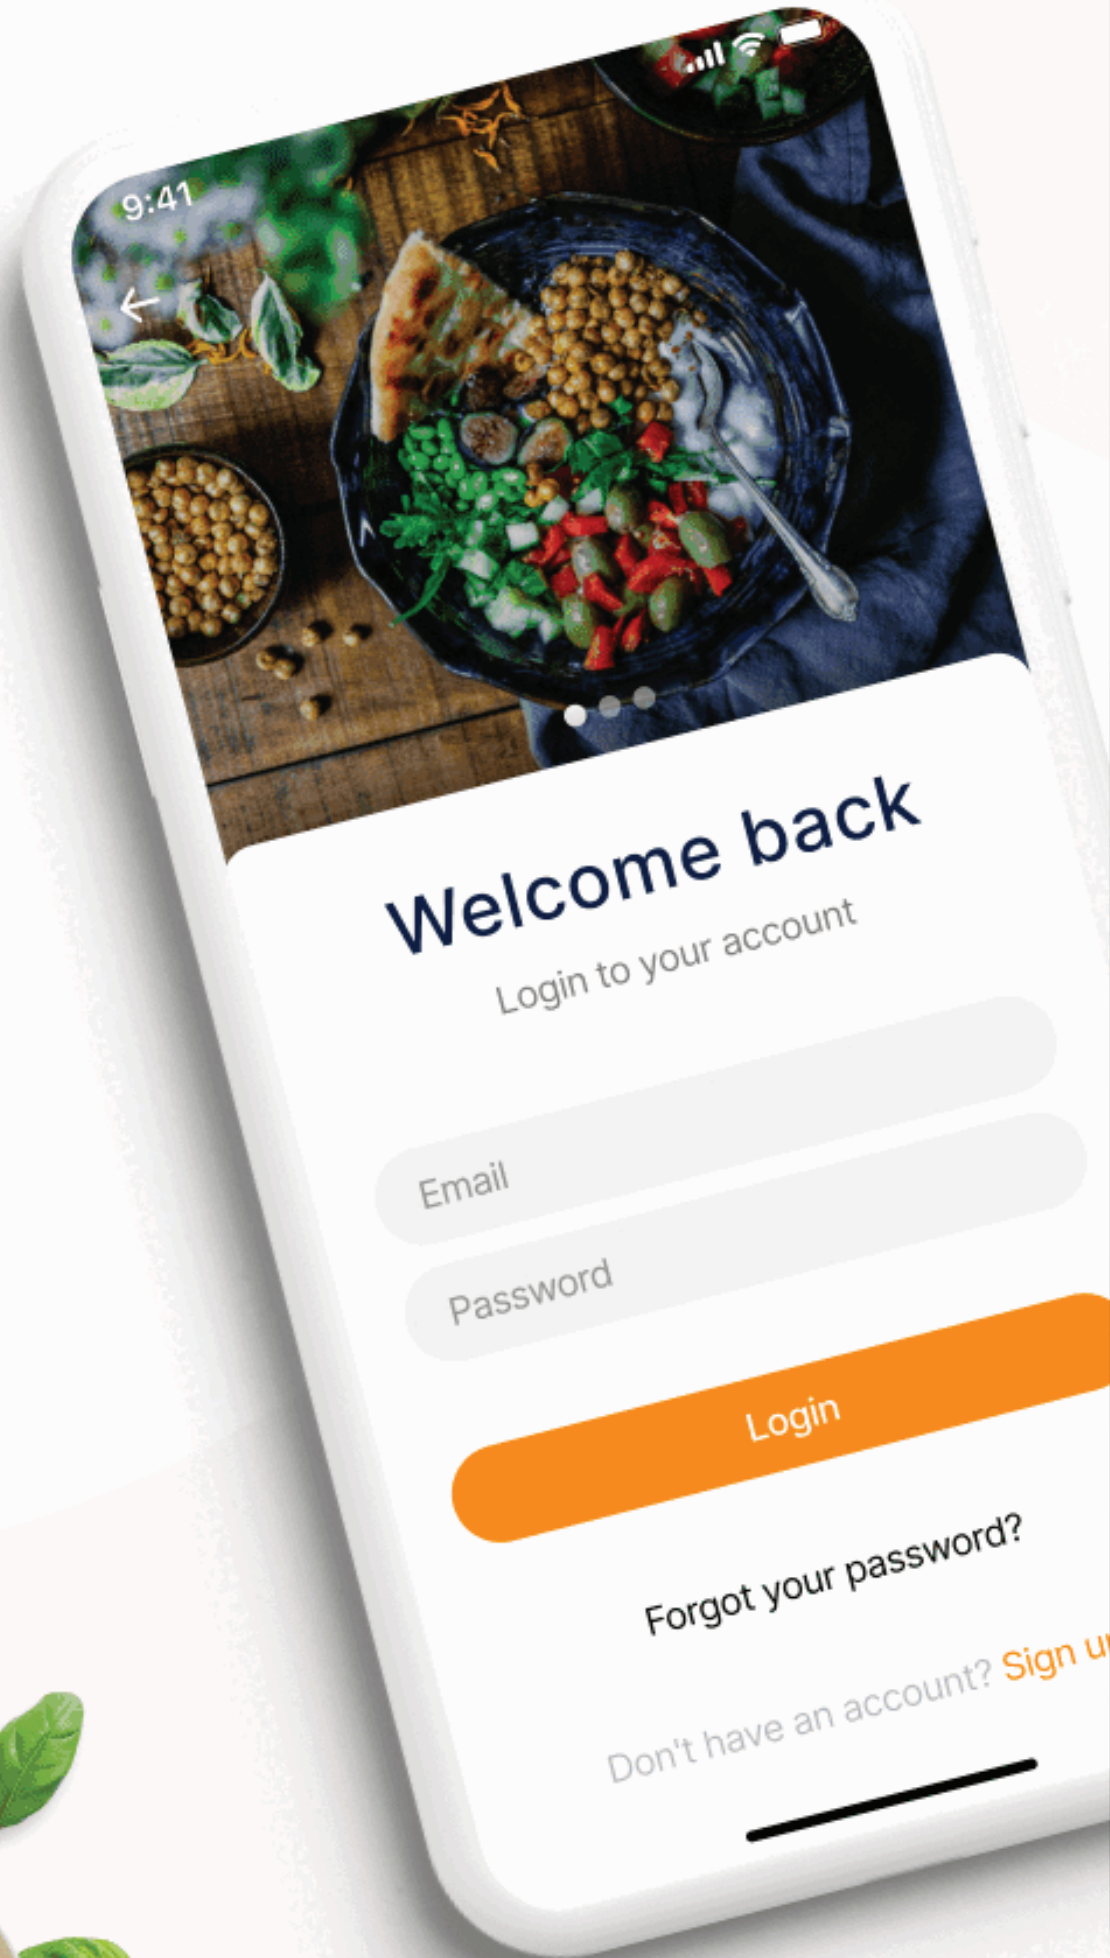

Wireframe

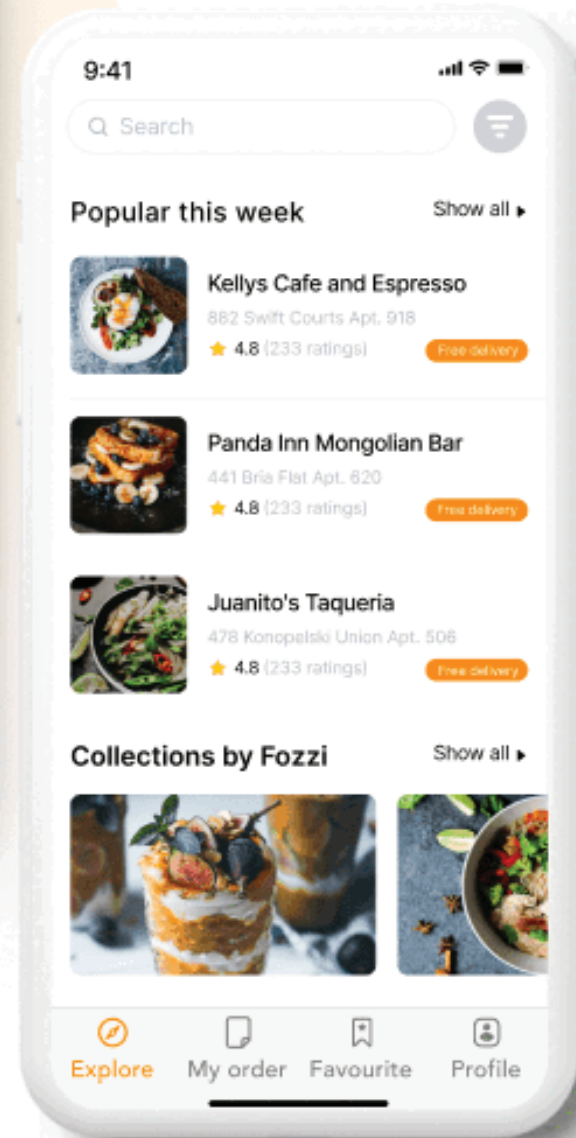

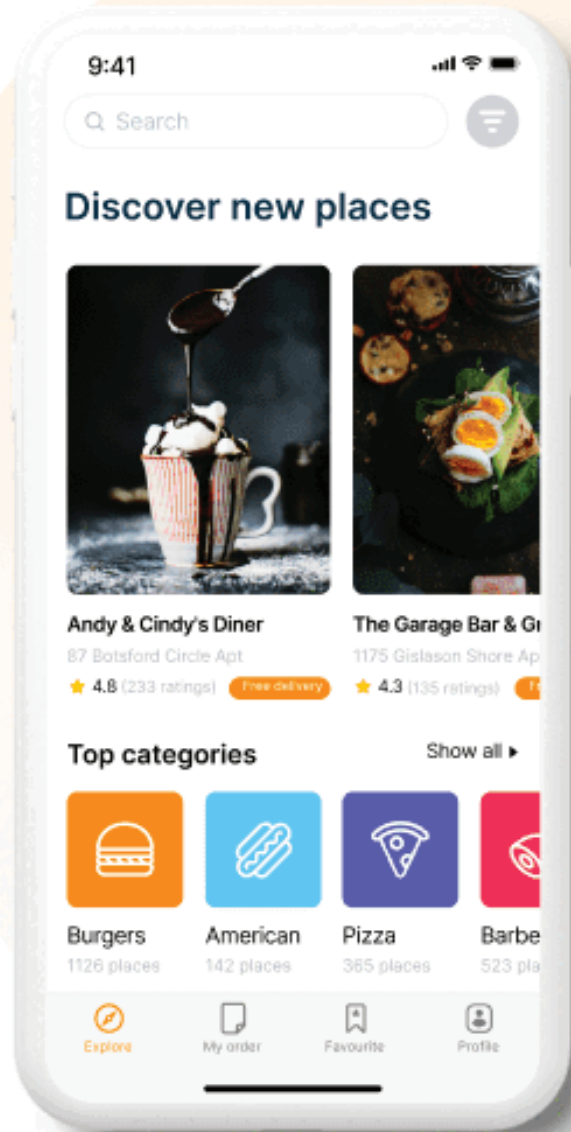

Our expert UI/UX designers complete the wireframe and discuss it with the team and client to know if the element placement is perfect on each individual page.

UI / UX Design

Our expert UI/UX designers complete the wireframe and discuss it with the team and client to know if the element placement is perfect on each individual page.

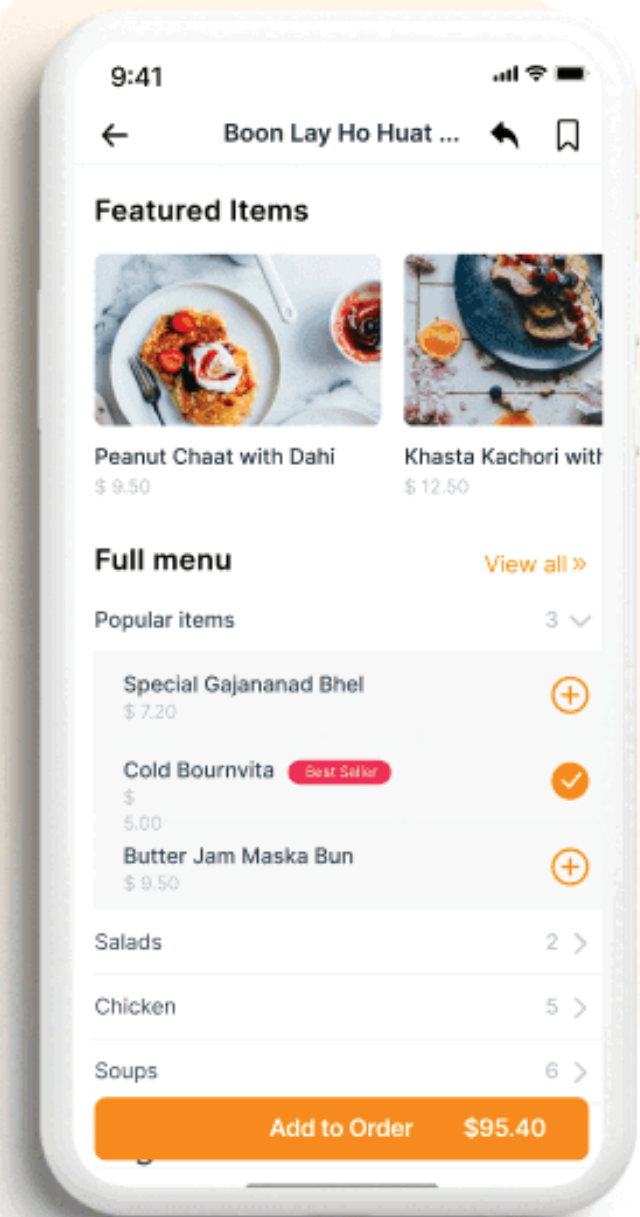

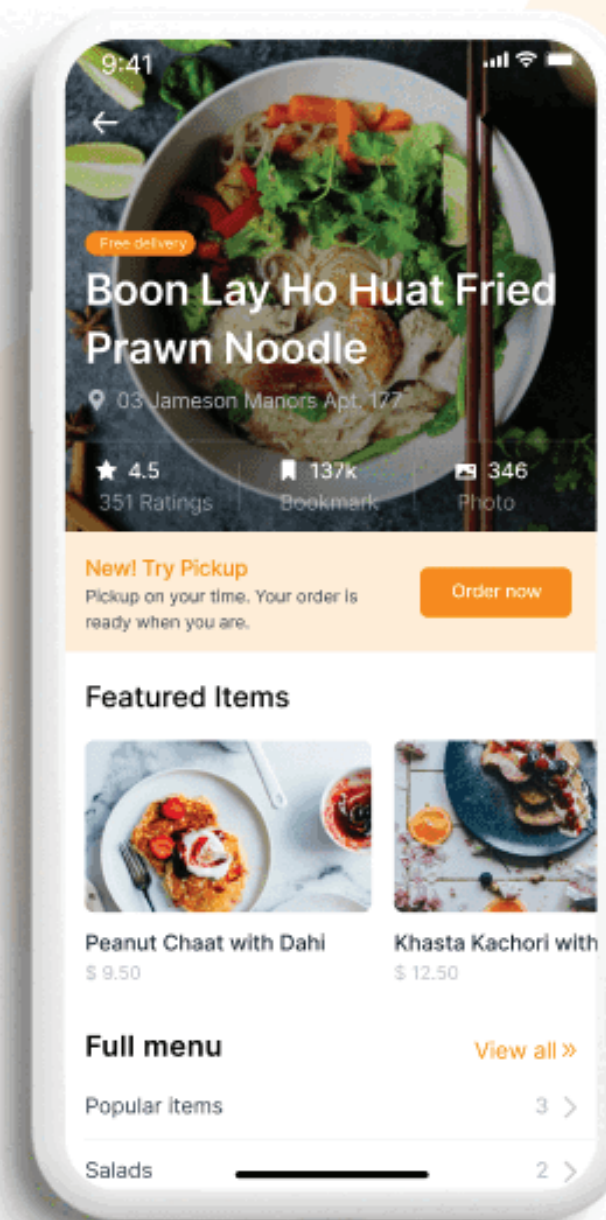

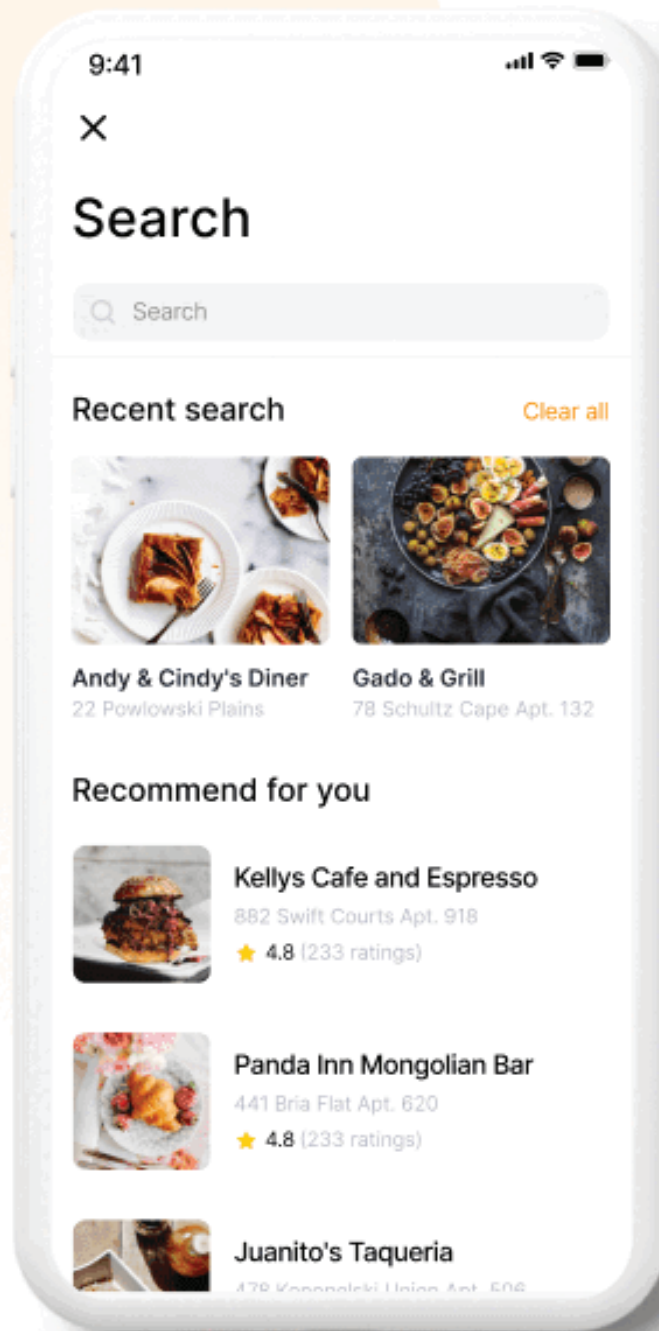

Dashboard

The home page will have search options, suggested and popular food & restaurants with tabs for dine-in and subscriptions.

Restaurant profile

Each restaurant will have a delivery option menu, booking option for dine-in, address, timings, photos and reviews by users.

Easy search

Provide options for users to search for their favorite restaurants and food by offering them search suggestions.

Payment options

List various payment options like mobile wallet, UPI, card payment, online banking and cash on delivery.
