# Taxi Booking Workflow

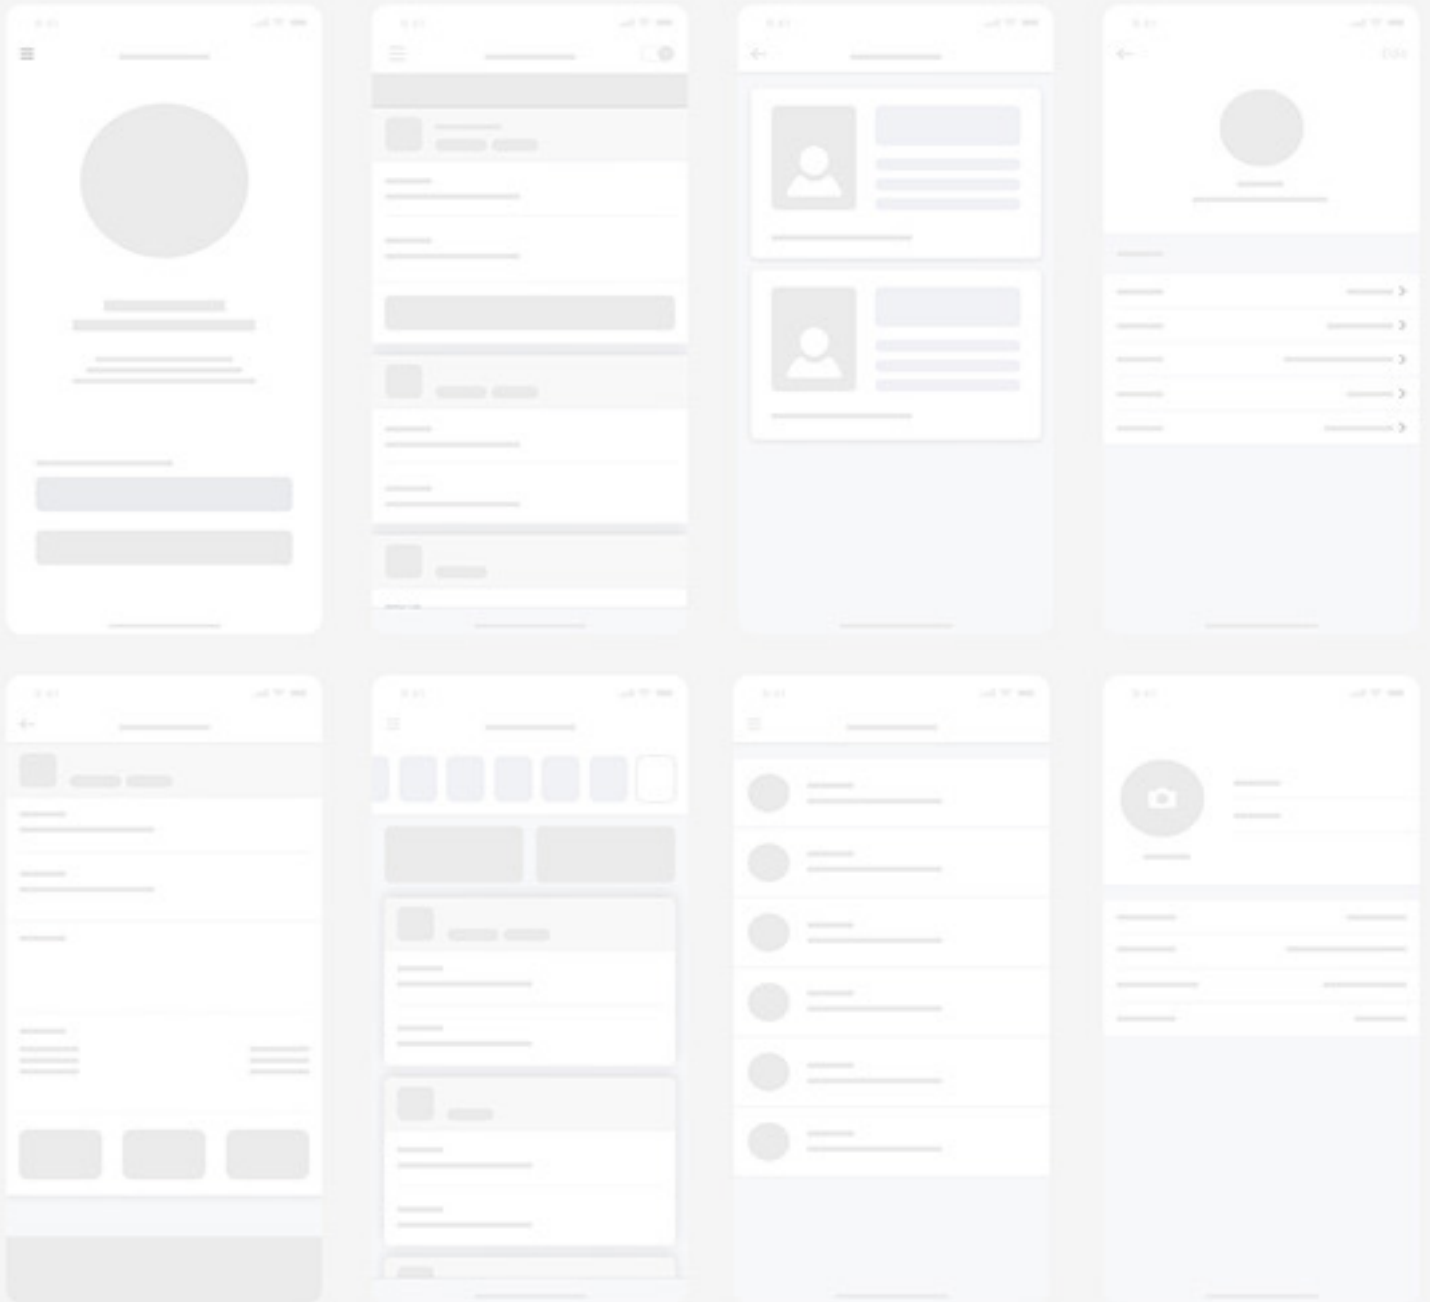

The on-demand taxi app driver panel workflow design starts with knowing the customer business needs. A good logical flow of functions makes sure that the end-user completes the journey from start to finish seamlessly.

# — Taxi Booking Wireframe —

The on-demand taxi app driver panel wireframe is visual extension of the workflow in the mobile app form.

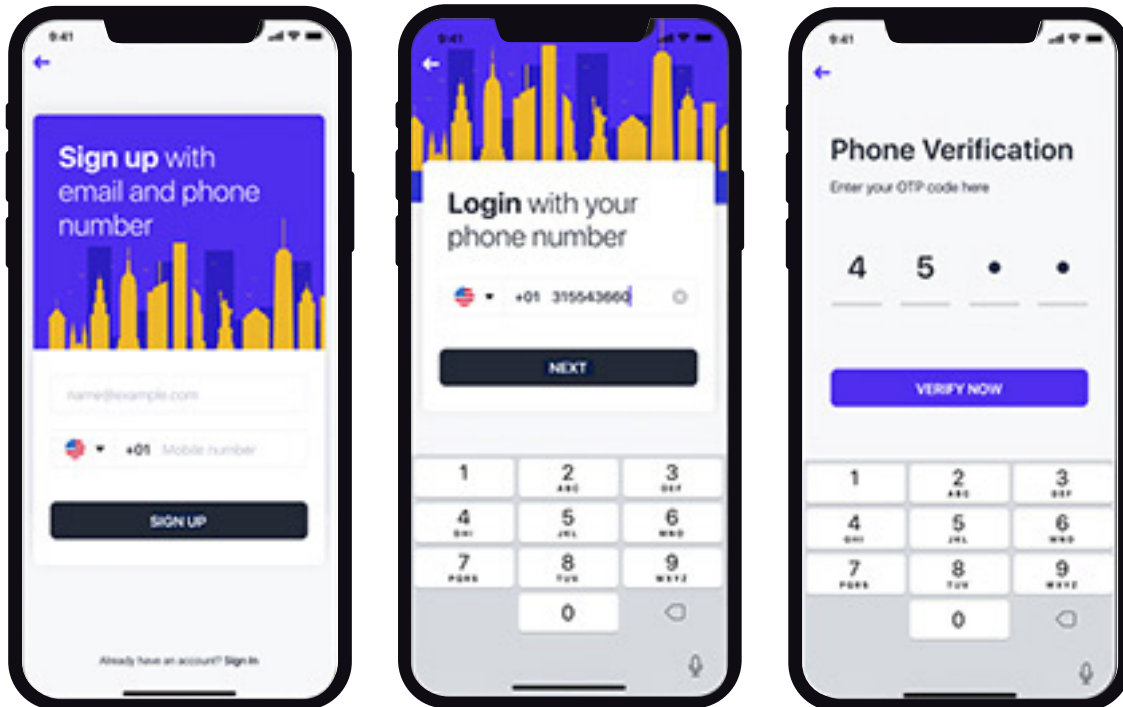

Brussel Lake Paragon ensures that the navigation is seamless and the elements on the page serve their function without any glitch.

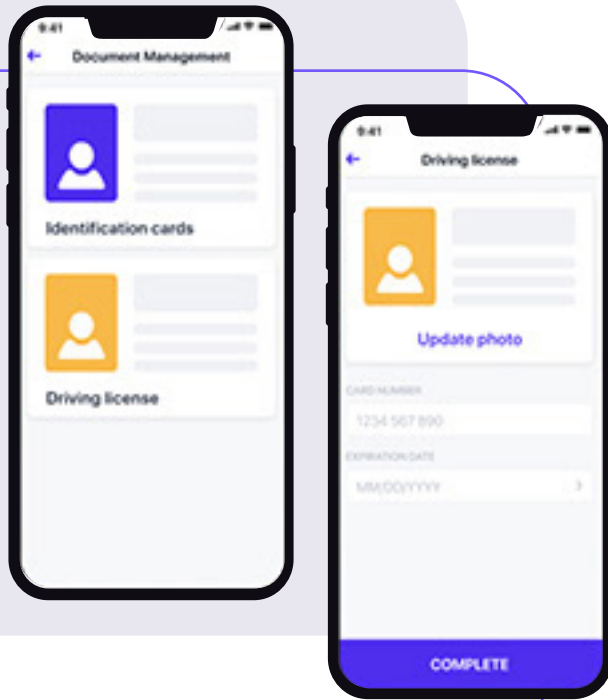

# — Taxi Booking UI Design —

The on-demand taxi app driver panel UI design encompasses bringing the wireframe to life. The designer team at Brussel

Lake Paragon selects appropriate colors, fonts and backgrounds that sync with the brand identity.

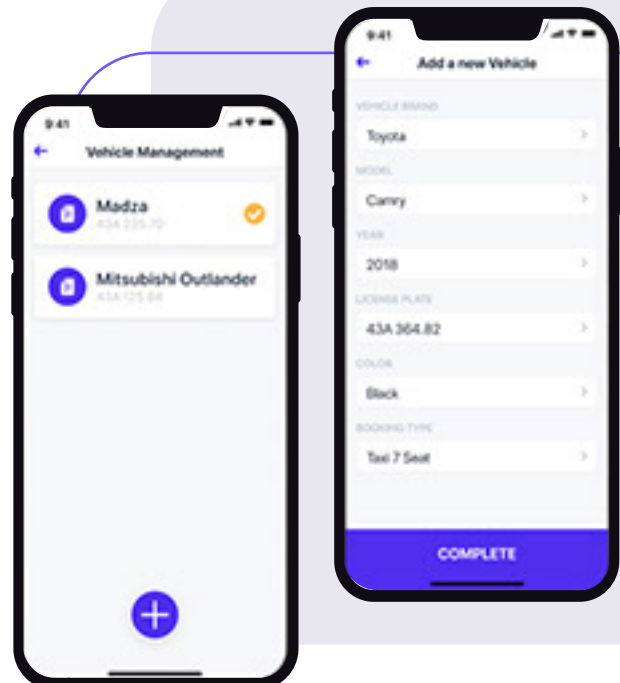

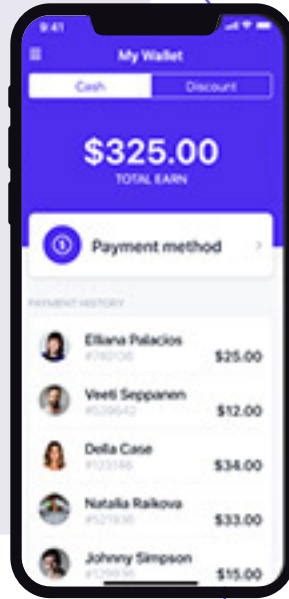

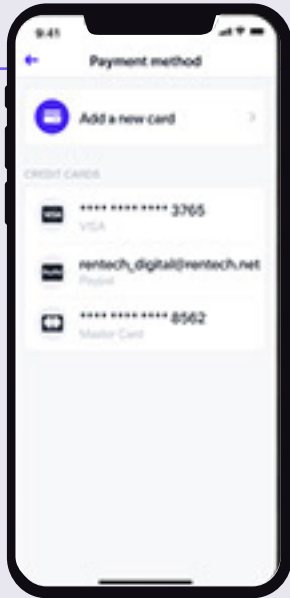

## 01 Document upload

A user is given the option to sign using an email id or through a social media account

## 02 Vehicle management

The driver uploads the vehicle details like the brand name, license number, color and seating type. The driver can add vehicles or manage the added vehicles from this section.

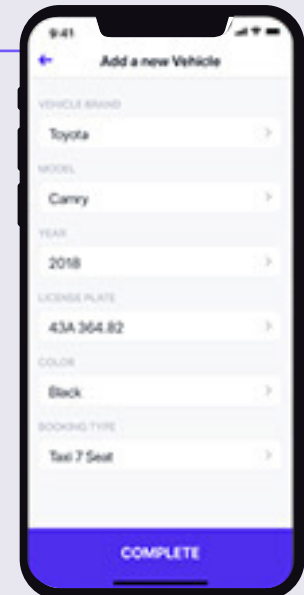

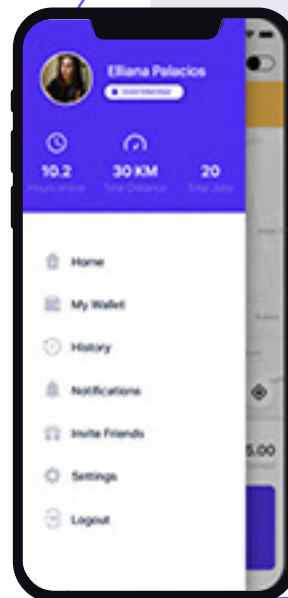

### 03 Wallet

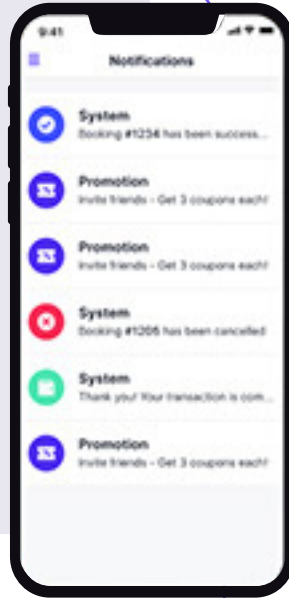

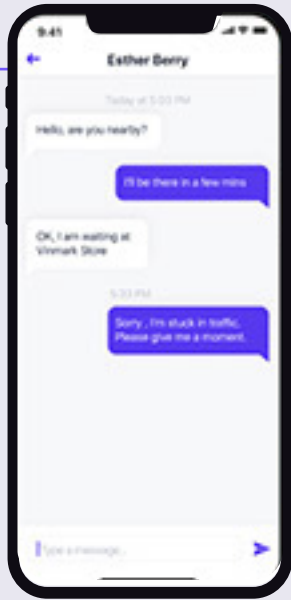

The driver files in the details needed for the payment transactions. The money earned is added to their app wallet. It is transferred to their bank account.

### 04 Driver Profile

Through the profile section, the driver can edit profile details like name, photo. The document & vehicle management are done here.

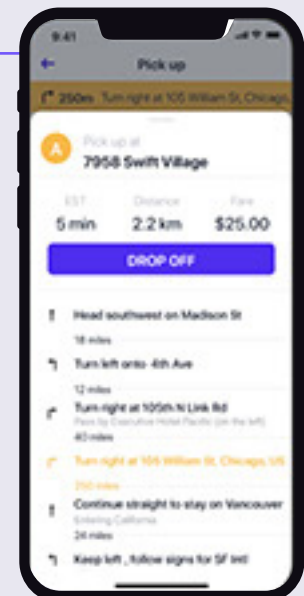

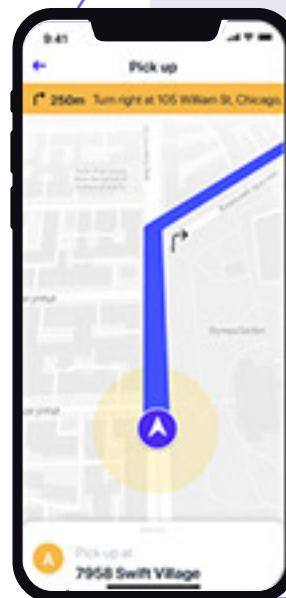

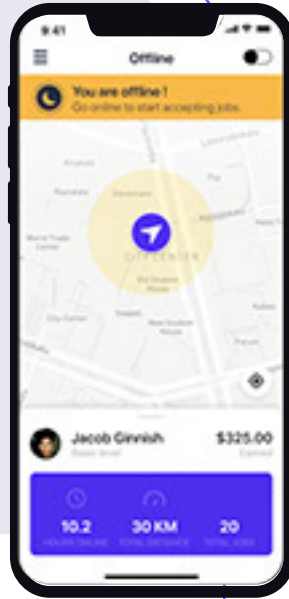

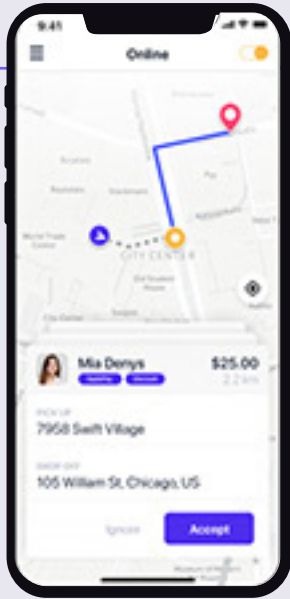

## 05 Notifications

The driver views the app notifications related to their rides in this tab.

## 06 Real-time tracking

The driver tracks the current location of the passengers through this feature.

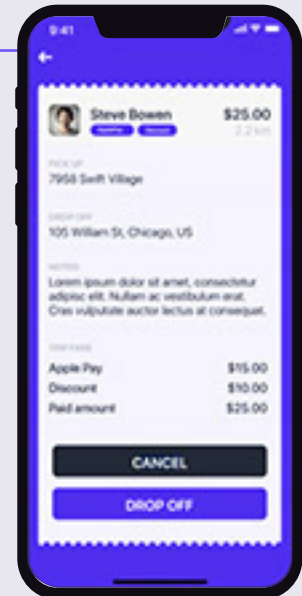

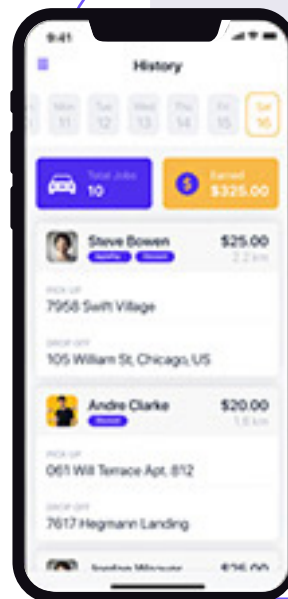

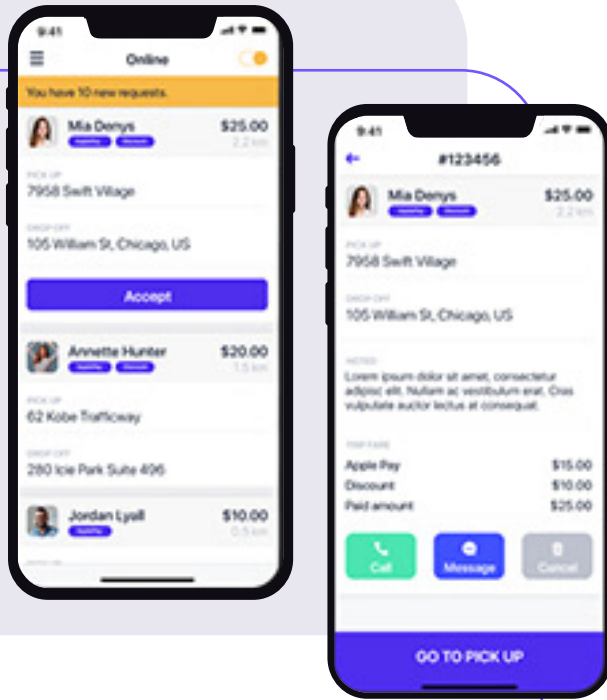

## 07 Trip Alert

The driver receives real-time ride requests from nearby locations to ferry passengers to their destination.

## 08 Ride history

The driver history displays the name of the passenger, the pickup & drop destination, the time, and the ride earnings.

## 09 Schedule bookings

The driver views the scheduled passenger trips in this section. The app sends a notification when the trip time is due.

## 10 Referral

The driver invites other friends from their contact list to sign up for the app. The driver is rewarded for getting friends to sign up.
