

Travel Mobile App

Travel apps offer much more than just listing tour packages and flight options. With growing competition, the customer benefits the most when your app offers better features and the best deals.

Workflow

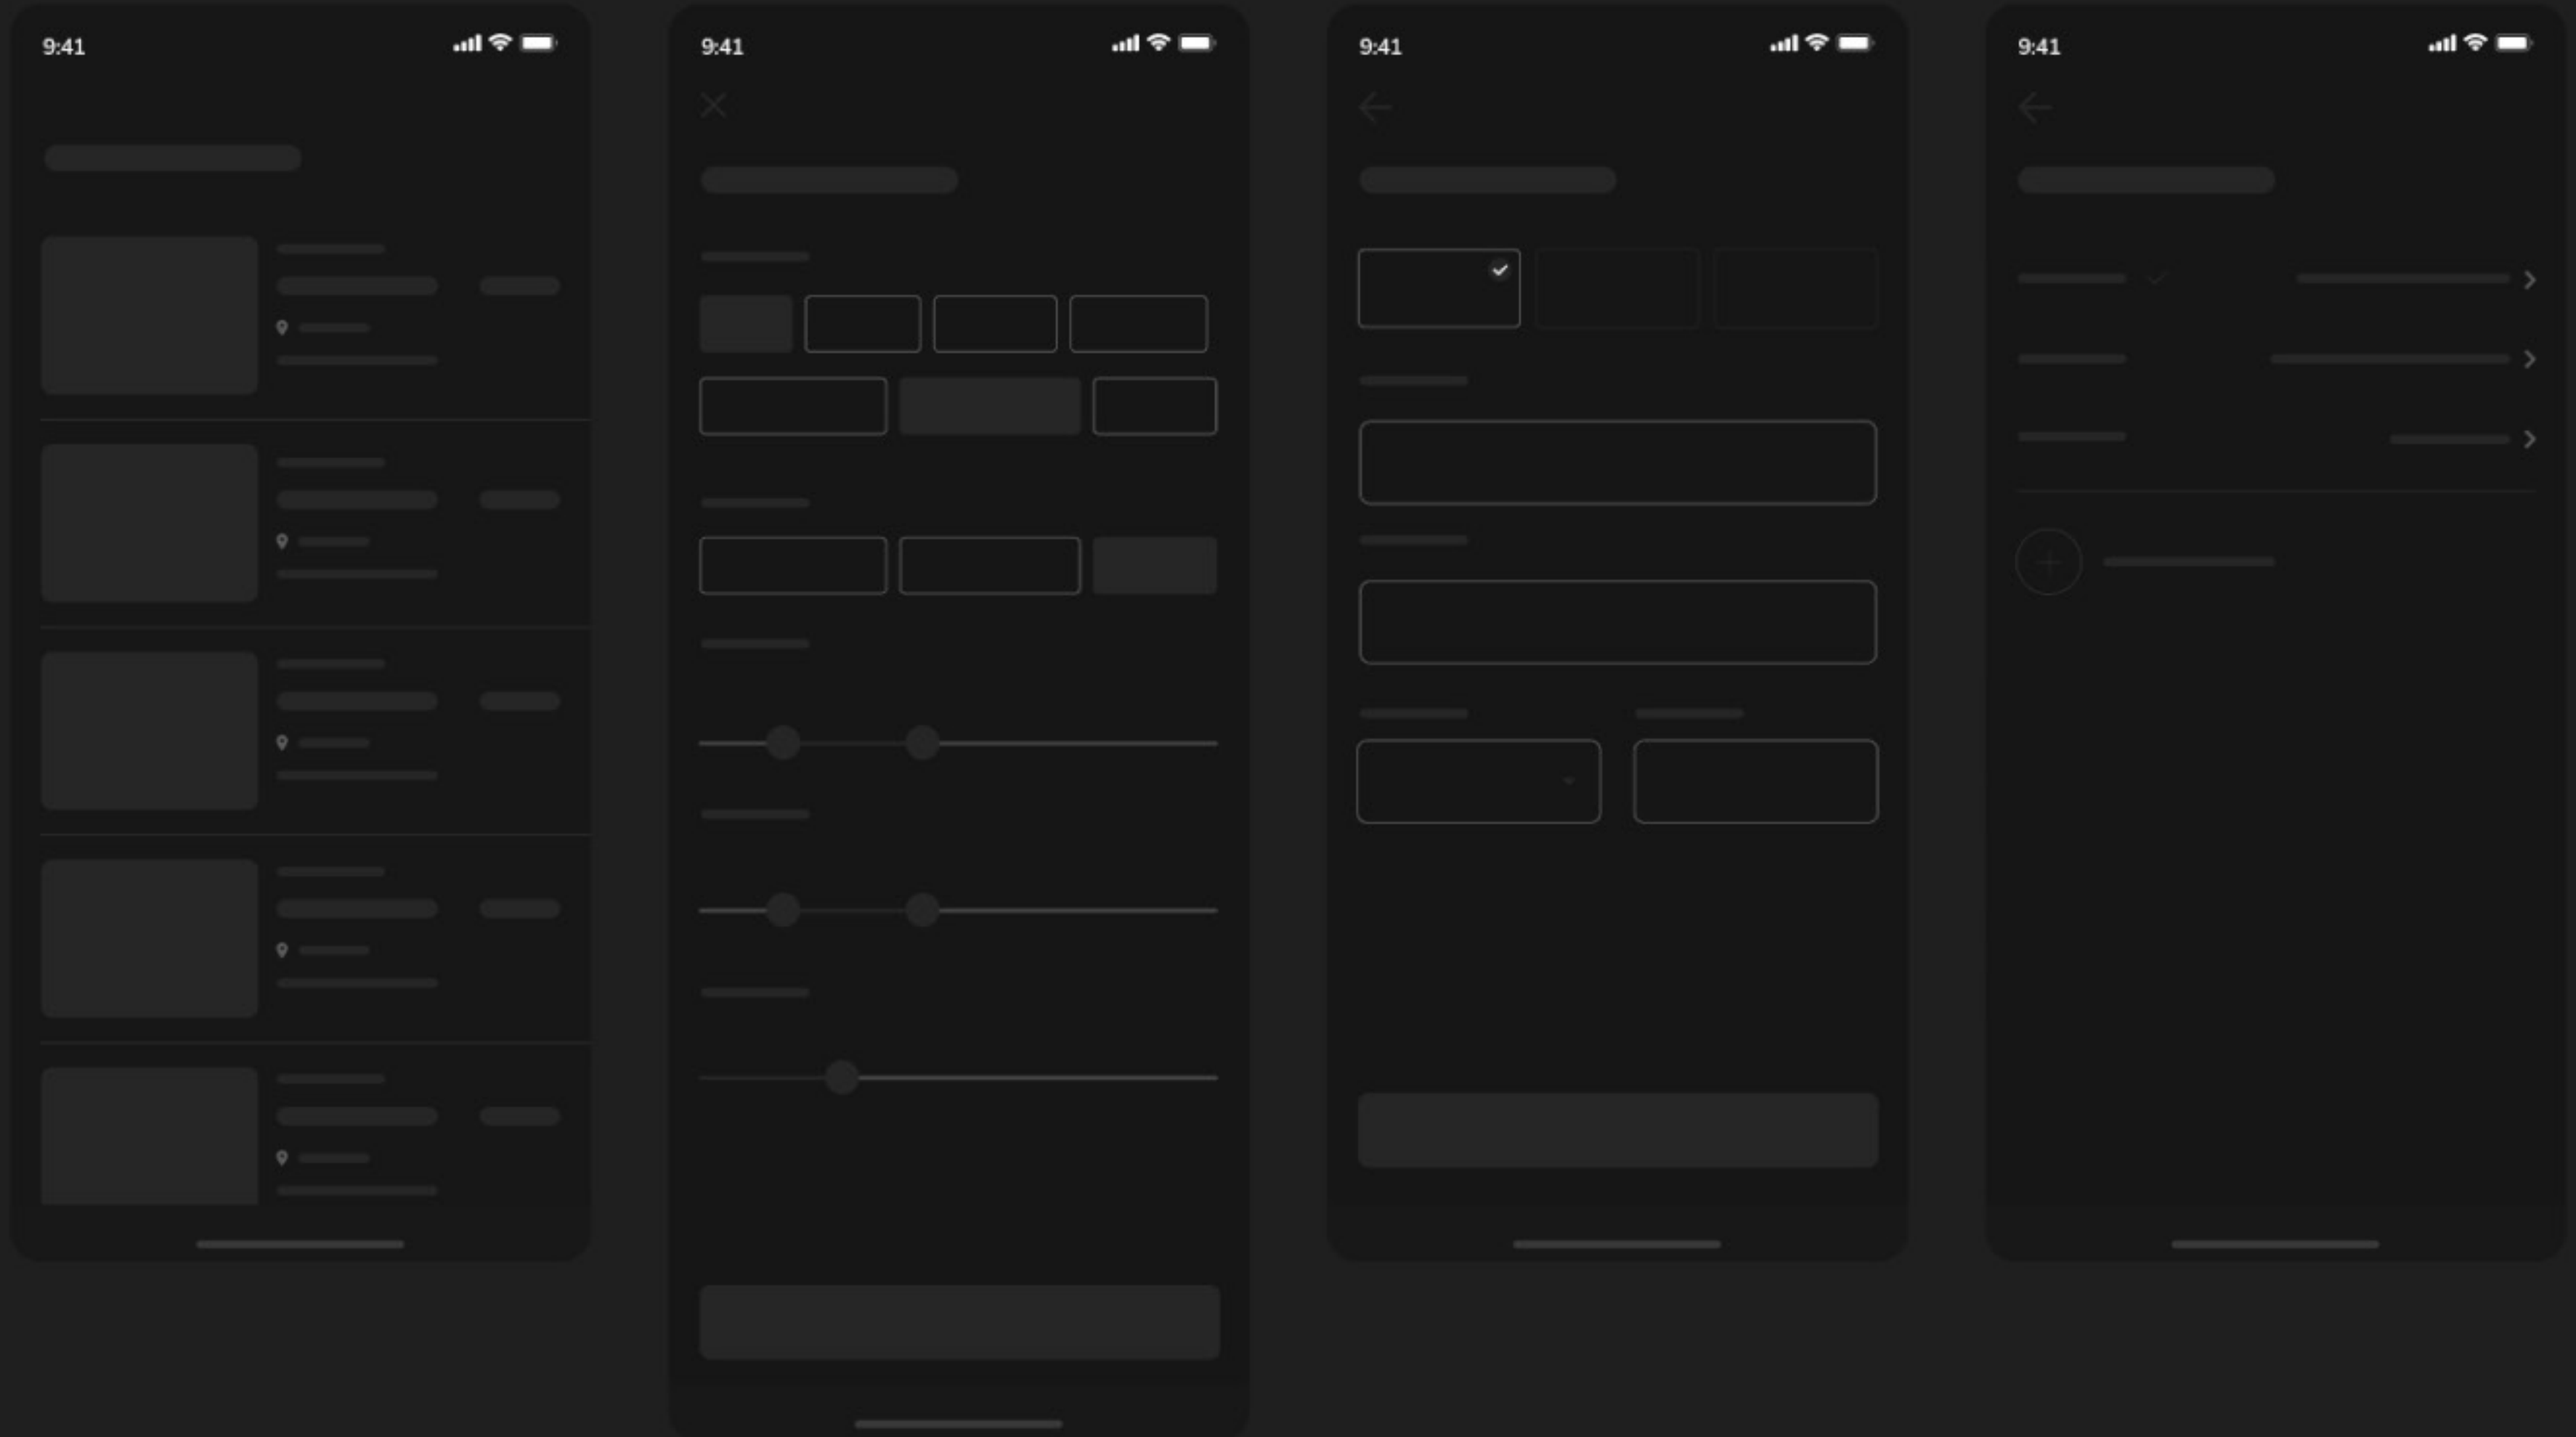

The first step in designing a travel app is its conceptualization. We talk with our customers to know their business intent.

Wireframe

The travel app wireframe design starts with knowing the user intent. Each and every step is detailed to offer a seamless browsing experience to the users.

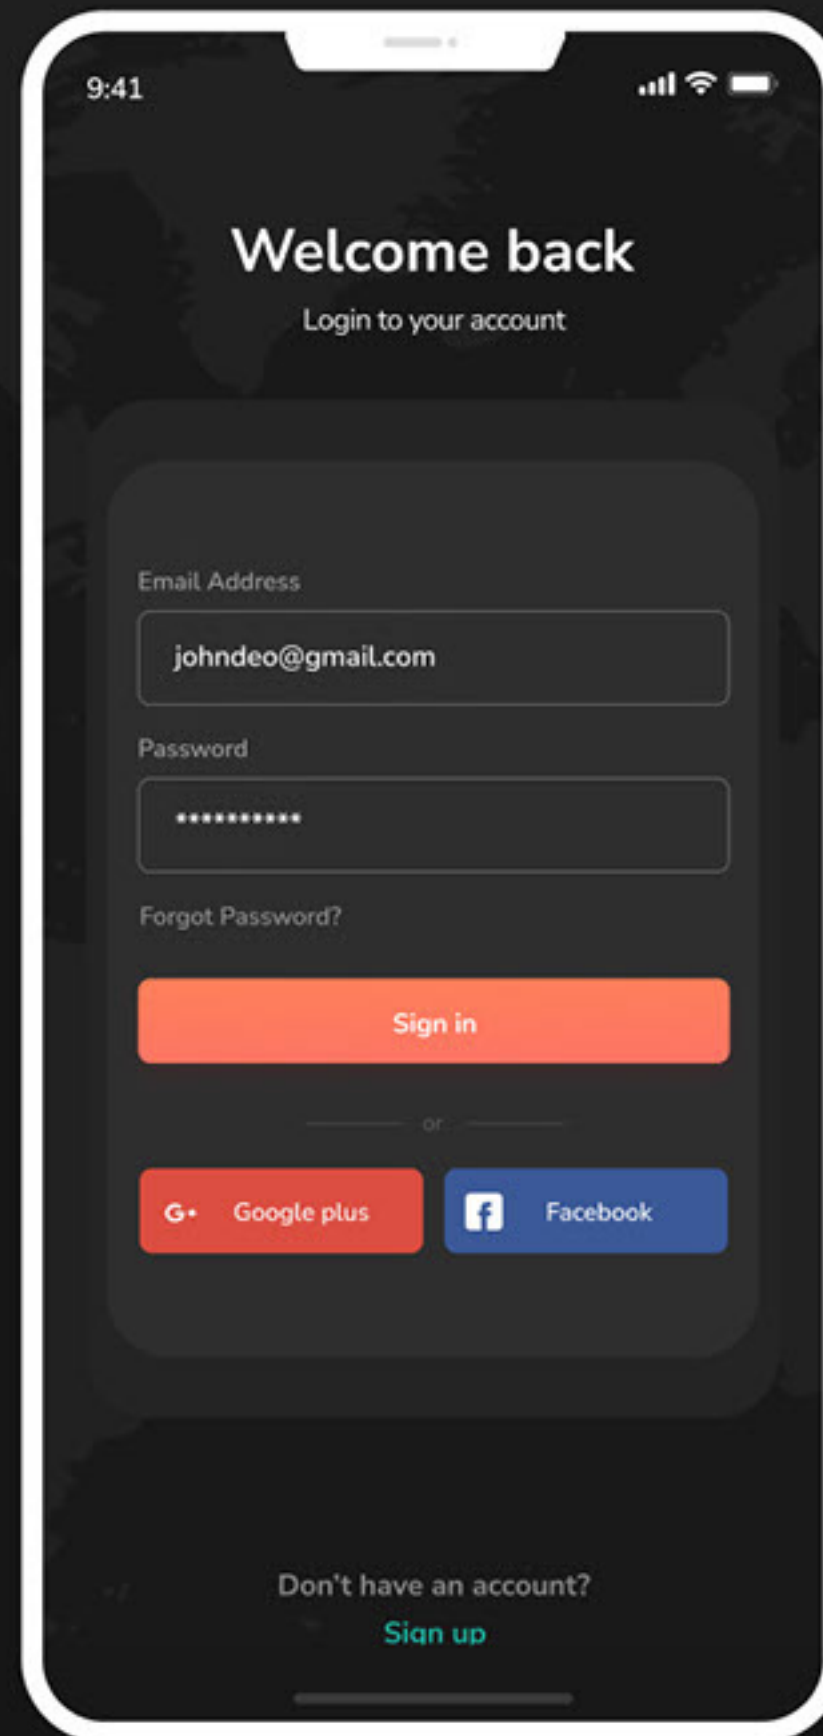

UI/UX Design

After completion of the wireframe, the travel app UI design is completed by deciding the typography, colors and elements.

App registration

The app registration is for first-time users. This is enabled through their email id, contact number or social media accounts.

Package deals

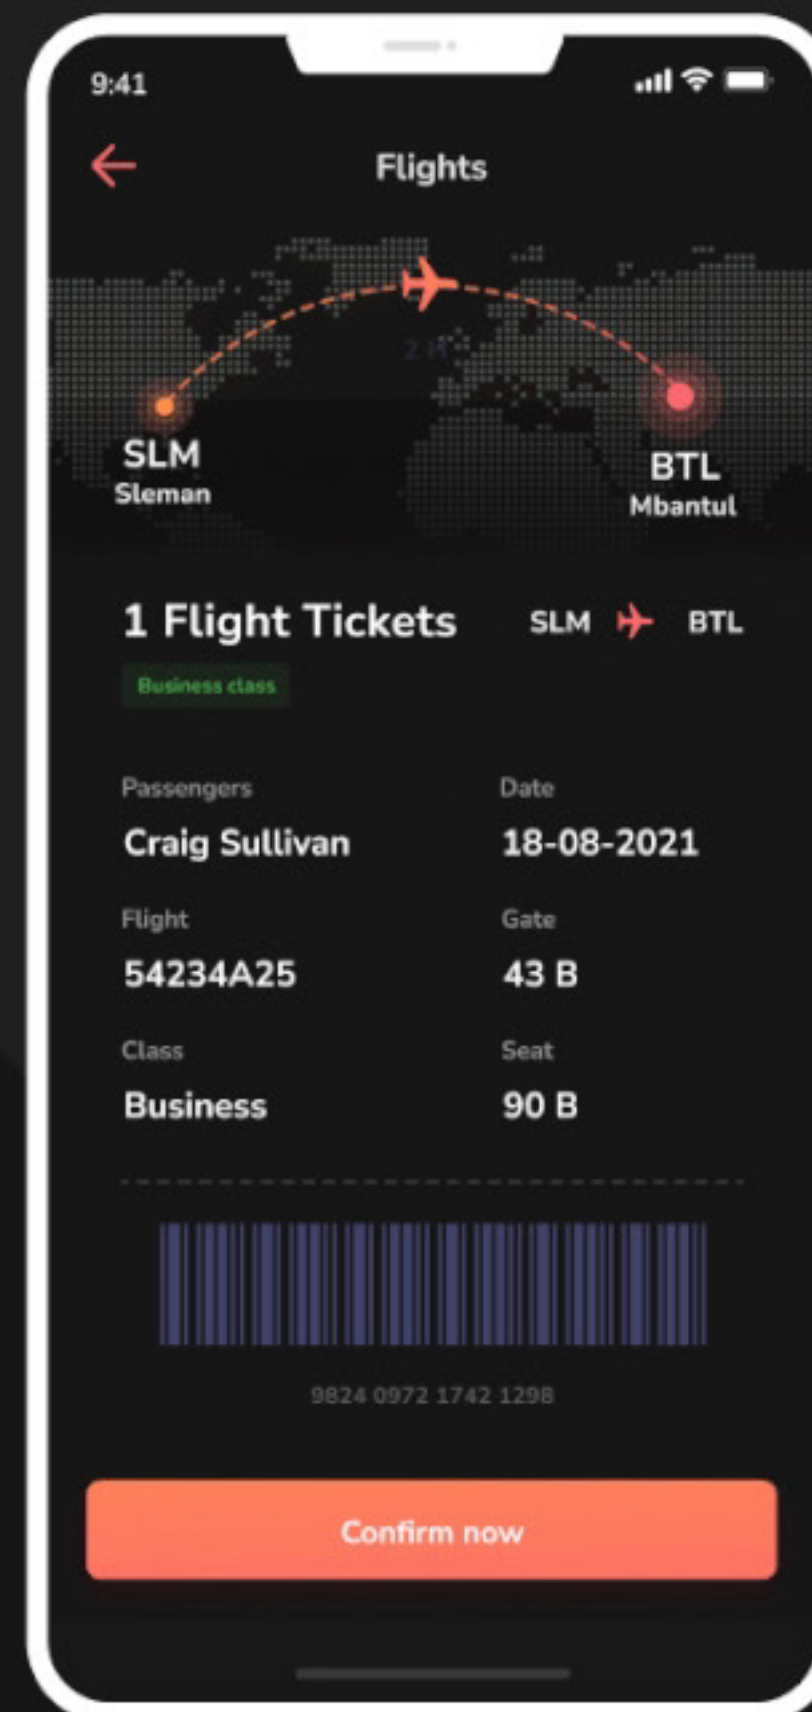

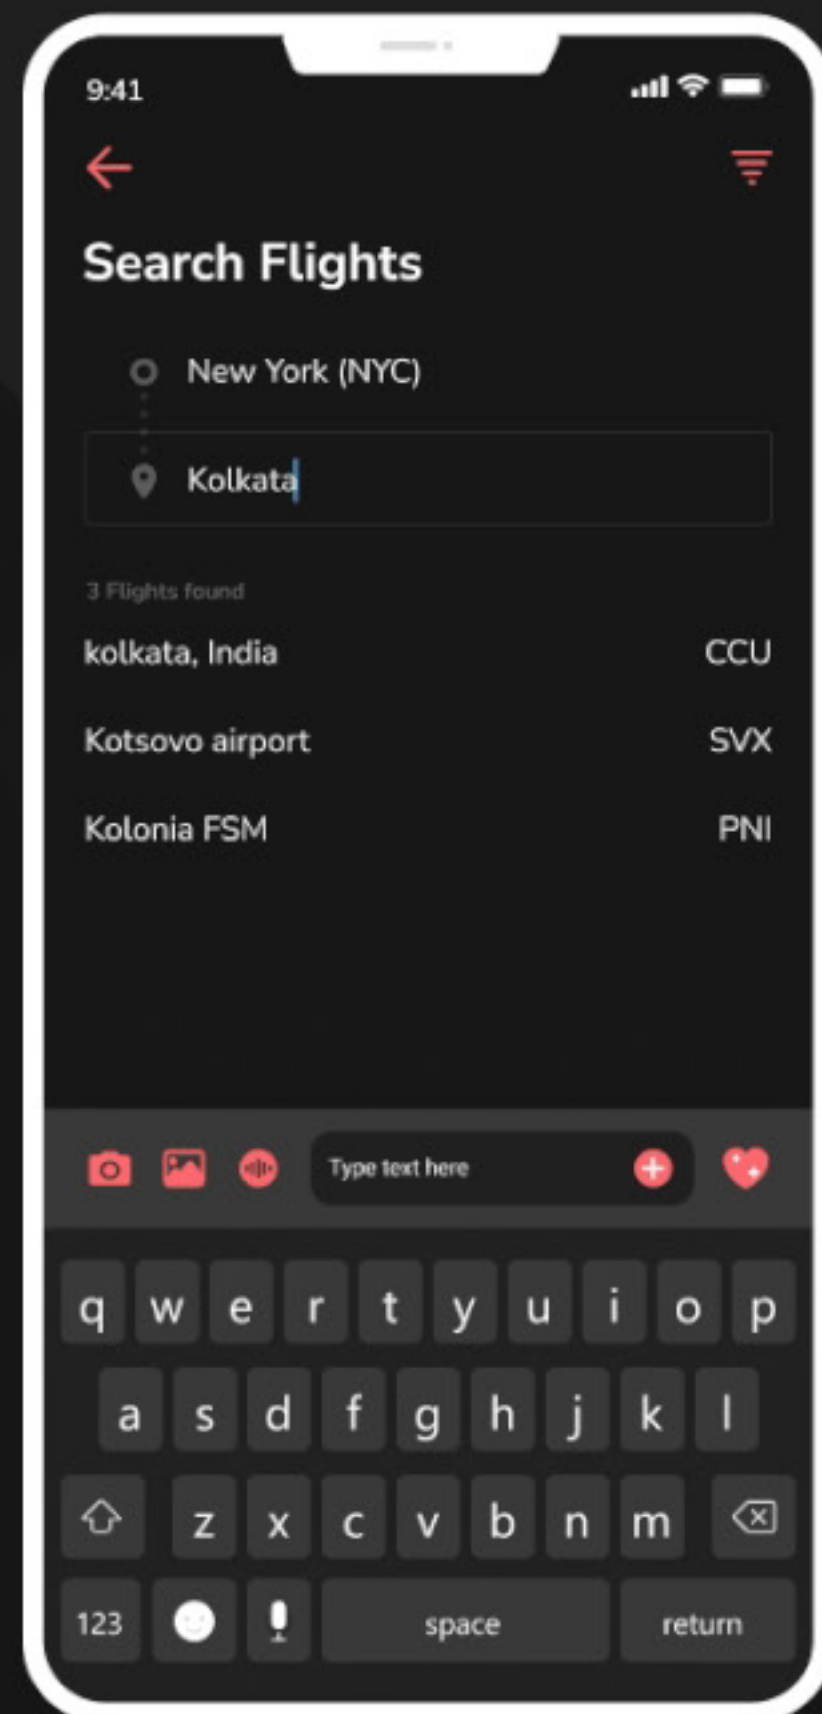

The various tour package deals are the first thing a user encounters when visiting the travel app.

Search

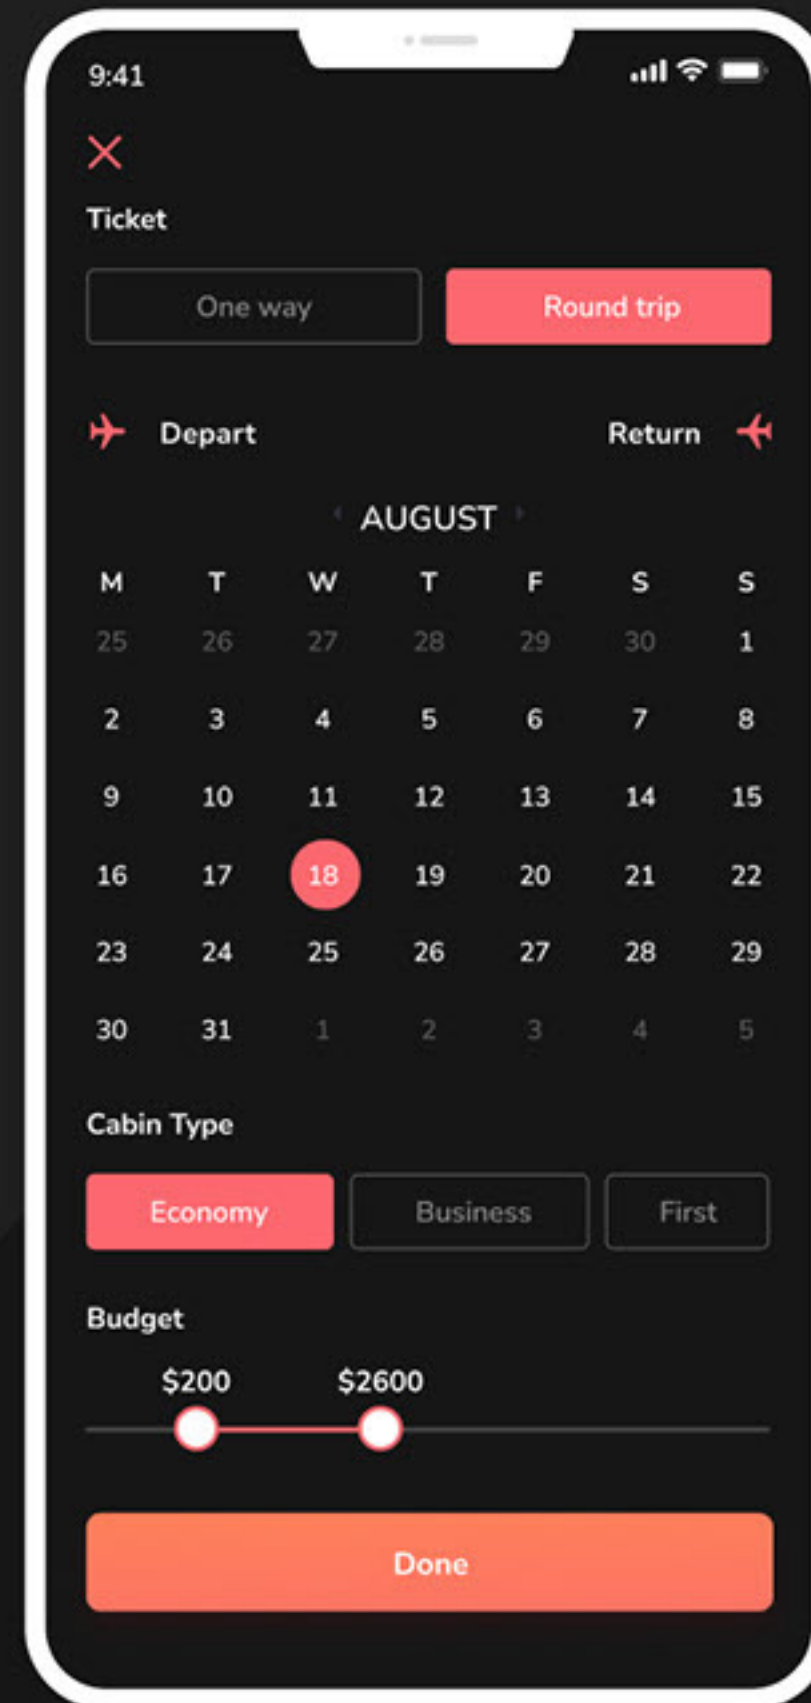

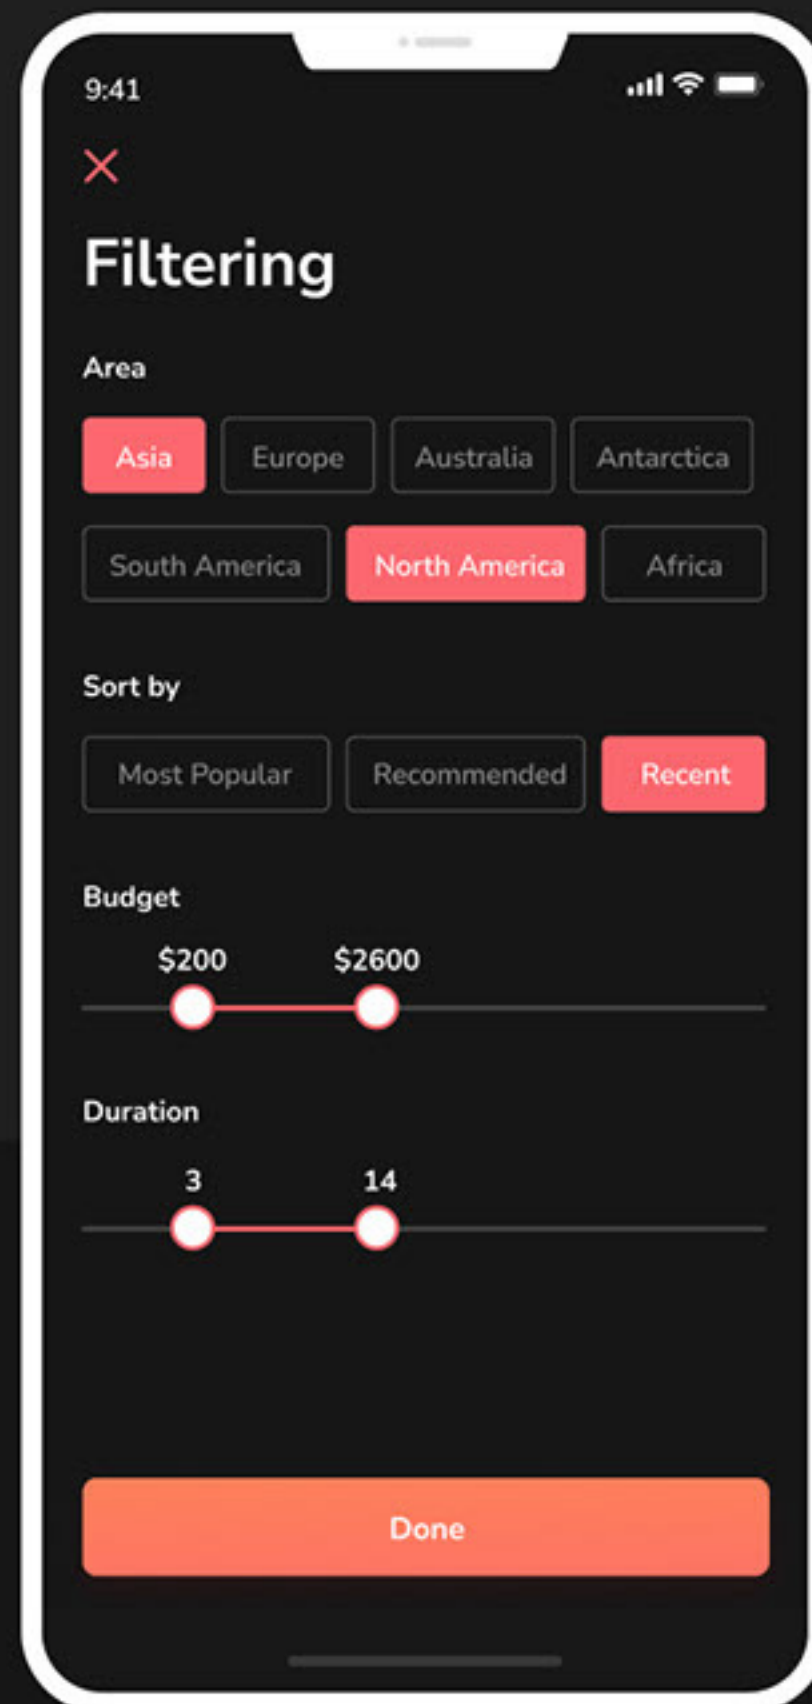

The search option is for user convenience. It helps them to find their tours of interest by typing the location.

Filter option

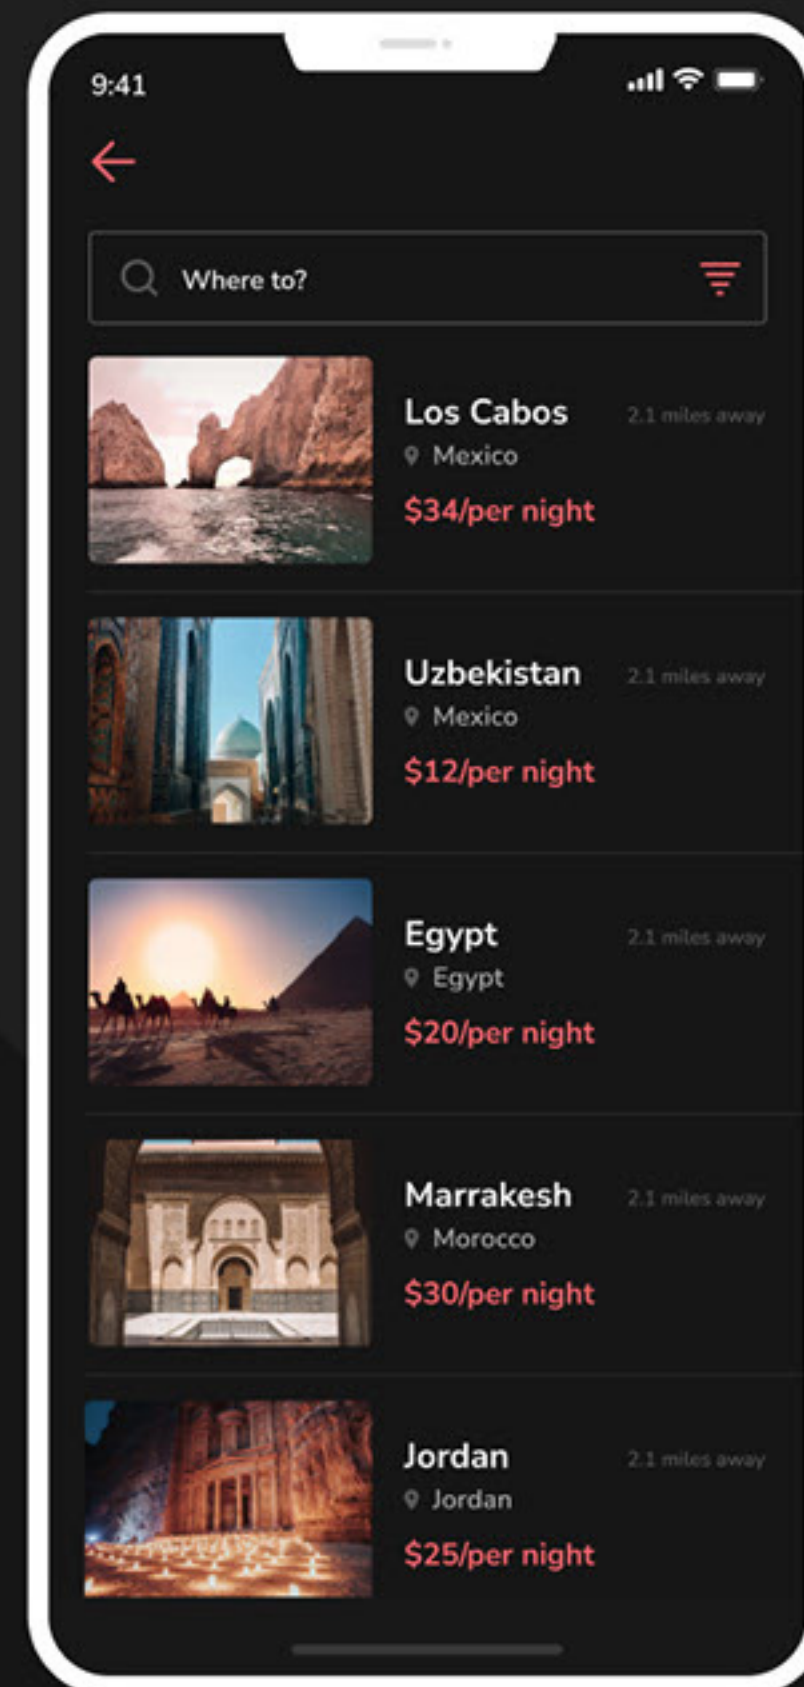

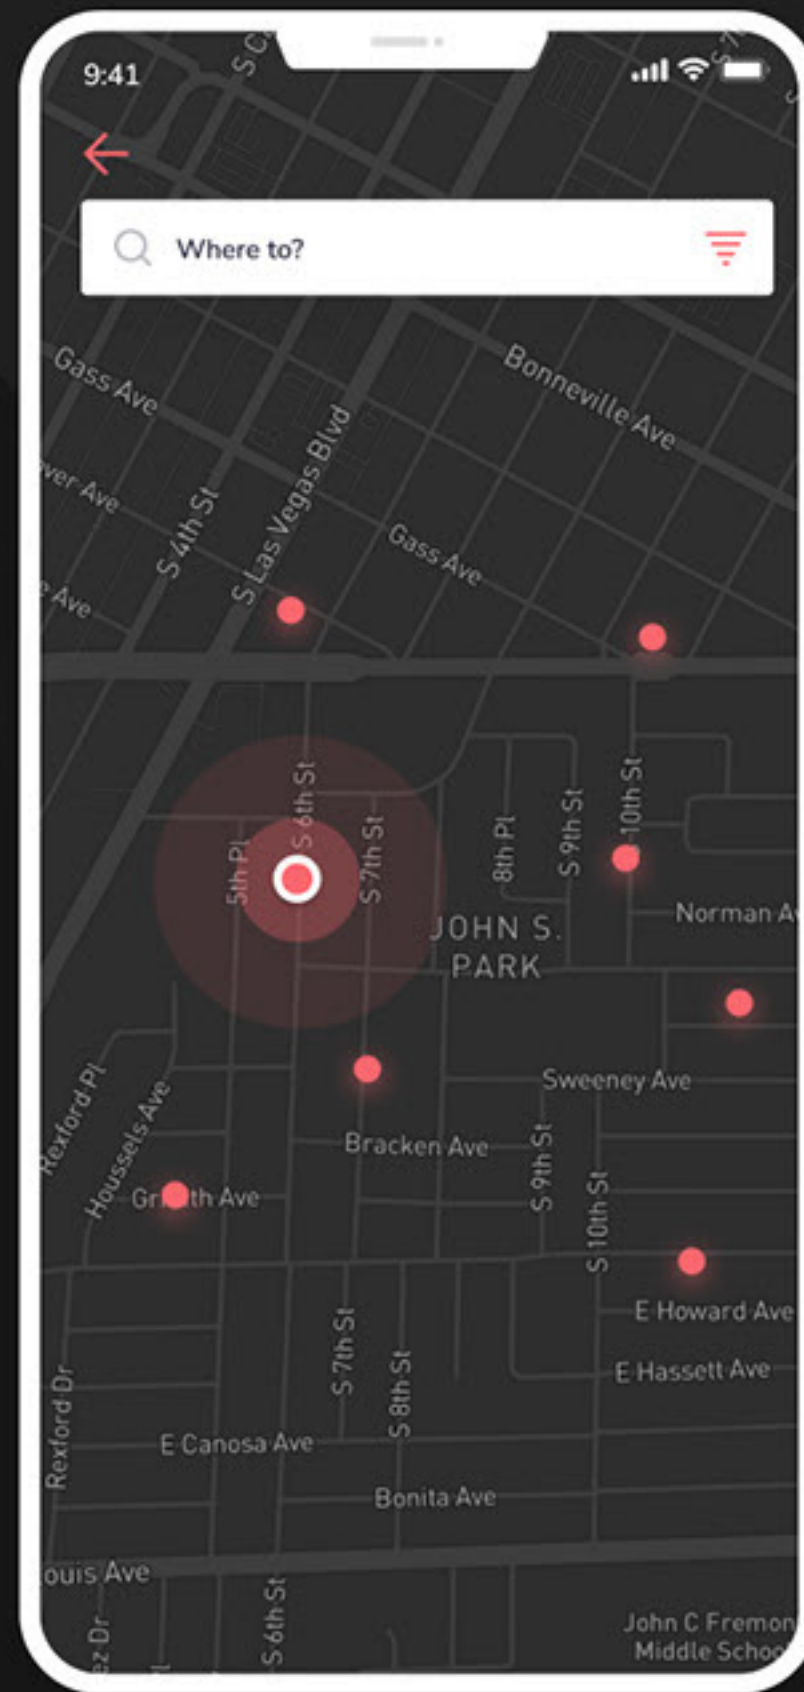

The filter option helps the user to narrow down their search and get the desired tour packages fast and in an easy way.

Site map

Each tour package can include a downloadable site map for reference and exploration.

Payment method

The user is offered various payment options to book the tour. It can be cards, mobile wallets or net banking.

Reviews

User reviews for tours help the visitor to decide on the pros and cons for that particular tour before taking a decision.
